EDITOR'S NOTE

This index was prepared cooperatively by a staff recruited from various divisions of the Library. To expedite its publication, journals on Chemistry, Physics and Veterinary Medicine were eliminated as they were assumed to be adequately indexed in Chemical Abstracts and the Bibliography of Agriculture. Articles listed in the weekly issues under Anthropology, General, History, Bibliography, Biography and Nutrition were indexed selectively; however, articles with any possible medical significance were included. This index further differs from the usual form in that articles have been indexed on a title-word basis when the subject could be expressed in that way. Inconsistencies in terminology result from this procedure as the need for publishing this index was considered urgent.

Because of limitations of space, no cross references are included in the indexes to the CURRENT LIST. In order further to conserve space, the subject subdivisions used have been abbreviated wherever practicable. A list of the abbreviations adopted appears below:

abdom. abdomen	inflamm. inflammation
abnorm. abnormalities	inj. injuries, injurious
accomm. & refrac. accommodation and refraction	innerv. innervation
addict. addiction	instr. instruments
admin. & dos. administration and dosage	insuff. insufficiency
